Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The final rejection mailed July 7, 2006 is hereby withdrawn.

Claims 1-20, 27, 28 and 31-38 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 23, 2004.

Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In lines 2-3, it is unclear if "the at least one wing" refers to the first or second wings.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-26, 29, 30, 39 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Dehdashtian et al. (6,013,092). Dehdashtian et al., in figure 2f, disclose a balloon 12 in its contacted condition having a central portion

(the portion of the balloon 12 which is adjacent to catheter body 10) and a plurality of wings 20a'', 20b'', 20c'', 20d'' including two first wings 20b'', 20d'' wrapped in a first direction (counter clockwise) about the central portion of the balloon and a plurality of second wings 20a'', 20c'' wrapped in a second direction (clockwise) about the central portion of the balloon (col. 5, lines 6-16). As to claim 24, Dehdashtian et al. disclose a plurality of T-shaped structures (one T-shaped structure comprising wings 20d'', 20b'' and 20c'' and another T-shaped structure comprising wings 20d'', 20b'' and 20a'' prior to being wrapped about the central portion of the balloon as shown in figure 2e) extending from the central portion of the balloon, each T-shaped structure including one first wing and one second wing. As to claim 30, Dehdashtian et al. disclose a plurality of V-shaped structures (one V-shaped structure comprising wings 20a'' and 20b'' and another V-shaped structure comprising wings 20c'' and 20d'' prior to being wrapped about the central portion of the balloon as shown in figure 2e).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Thaler whose telephone number is (571)272-4704. The examiner can normally be reached Monday to Friday.
